## Allowable Subject Matter

1. Claims 4-9, 13-15 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Prior art does not teach that, an illumination head, connected to the power source device, and comprising a current detection resistor that detects a current flowing through a power supply circuit, at least one light emitting device connected to the power supply circuit in the illumination head, and an output terminal which connects to the input terminal of the power source device and outputs a voltage drop across the current detection resistor, wherein a resistance value of the current detection resistor generates a voltage drop equal to a predetermined reference potential when a rated current is supplied to each light emitting device, and the current controller controls the supplied current such that the voltage drop generated across the current detection resistor is equal to the predetermined reference potential recited in independent claim 4.

Prior art does not teach that, a resistance value of the current detection resistor generating a voltage drop equal to a predetermined reference potential when a rated current is supplied to each light emitting device; and an output terminal that outputs a voltage drop across the current detection resistor, wherein the illumination head is connectable to a power source device configured to supply a rated current to a plurality of different illumination heads having different rated currents recited in independent claim 5.

Prior art does not teach that, a reference potential when a rated current is supplied to each light emitting device, the input terminal connects to the output terminal,

Application/Control Number: 10/806,178

õ

the current controller is disposed such that the voltage drop generated across the current detection resistor is equal to the predetermined reference potential when the illuminating head is connected to the power source device, and the power source device is configured to supply a rated current to a plurality of different illumination heads having different rated currents recited in independent claim 6.

The remaining dependent claims 8-9, 13-15 are allowable for at least above reason.

Prior art made of record and not relied upon is considered pertinent to applicant's disclosure. None of record prior arts stands alone or combination with the others discloses all limitations required in claim invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Citation of relevant prior art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure Haller (US 6,485,112) and Okawa et al (US 6,157,160) are cited to show a lighting control system.

## Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh Dieu A whose telephone number is (571) 272-1817. The examiner can normally be reached on M-F (5:30 AM-2: 45 PM).

Application/Control Number: 10/806,178

Art Unit: 2821

If attempts to reach the examiner by telephone are unsuccessful, the

examiner's supervisor, Owens Douglas W can be reached on (571) 272-1662. The

fax phone number for the organization where this application or proceeding is

assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for published

applications may be obtained from either Private PAIR or Public PAIR. Status

information for unpublished applications is available through Private PAIR only. For

more information about the PAIR system, see http://pair-direct.uspto.gov. Should you

have questions on access to the Private PAIR system, contact the Electronic Business

Center (EBC) at 866-217-9197 (toll-free).
